Introductions and Background

Assessment, Policy Development and Evaluation - PHSKC:

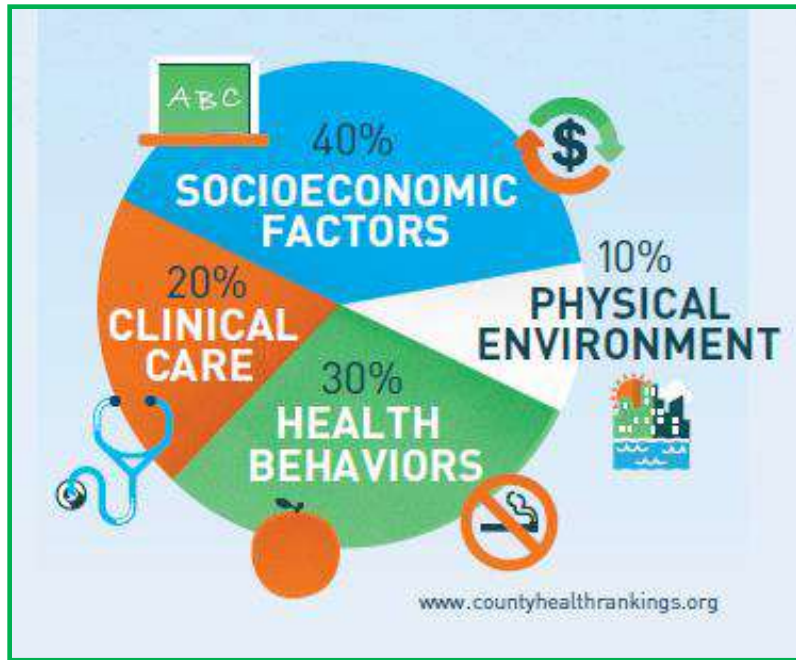

- Collaborate with community and other departments to assess the health of county residents and neighborhoods, and help evaluate the impact of program and policy interventions
- Produce data and reports to inform decision making and provide a range of technical assistance & analytical support, including to the King Co. Accountable Community of Health (ACH)

Participants on Today's Webinar:

- Joined by staff and stakeholders from multiple ACH regions, including representatives from some of the organizations that produce the community health data we will be looking at today

Purpose and Plan

Share information on some available data sources that can help ACHs put together a fuller picture of community health needs.

We will show how to find on-line resources, and provide additional contact information, for the following:

- WHA Community Checkup
- DOH WA. Tracking Network
- IP3's Community Commons
- RWJ County Health Rankings & Roadmap

Acronyms

WHA = Washington Health Alliance

DOH = WA. Department of Health

IP3 = Institute for People, Place & Possibility

RWJ = Robert Wood Johnson Foundation

Webinar Framework: Common Measures

Measuring Health Care Progress in Washington

WHAT IS IT?

The Washington State Common Measure Set on Health Care Quality and Cost are health care performance measures chosen so Washington can track important elements of health and see how well the health care system is performing.

Washington State is committed to ensuring our health care system is built on value. The Common Measure Set will help us measure our progress toward that goal. For a detailed understanding of results, visit www.wacomcommunitycheckup.org.

MEASURE CATEGORIES

ACCESS TO PRIMARY CARE

Whether children and adults are visiting a primary care doctor.

PREVENTION

Whether patients are getting recommended health screenings and immunizations.

HOSPITAL CARE

Whether hospitals are doing what they can to promote patient safety and the best outcomes for patients.

CHRONIC CARE

Whether patients with chronic conditions are getting recommended care from their doctor.

AVOIDING OVERUSE

Avoiding care that is potentially inappropriate, or prone to overuse.

BEHAVIORAL HEALTH

Assessing care for mental health and substance use disorder conditions.

WHY DOES IT MATTER?

There is a lot of variation in health. That is a sign that many people aren't receiving the care they should, while others are receiving care that won't help them. Using a common set of measures across the state to measure performance can help give us a clear understanding of where improvements are needed.

HOW DOES IT AFFECT YOU?

All the stakeholders in health care have a role to play in using the Common Measure Set.

Purchasers:

Use the measure set as a tool for value-based purchasing, rewarding providers for better outcomes rather than just volume.*

Health plans:

Use the measure set to align efforts and to hold providers accountable.

Providers:

Use the measure set as a focused way to understand where you can target health care quality improvement efforts for your organization.

*Washington State has already committed to using the Common Measure Set in its health care contracting and expects other purchasers will follow its lead.

Focus Areas: Categories of Data

WA. Common Measure Set for Quality and Cost		
Prevention	Acute Care	Chronic Illness
Adult Screening(s)	Avoidance of Overuse/Potentially Avoidable Care	Appropriate use of Medications
Childhood: early and adolescents	Behavioral Health	Asthma
Immunizations	Cardiac	Depression
Nutrition/Physical Activity/Obesity	Readmissions	Hypertension and Cardiovascular Disease
Oral Health	Obstetrics	Patient Experience - Cross Cutting
Tobacco Cessation	Patient Safety	
Unintended Pregnancy	Stroke

Select ACH Report

The screenshot shows the website wahealthalliance.org/alliance-reports-websites/community-checkup/. The page features the 'COMMUNITY CHECKUP' logo and a description of the report. A sidebar on the right lists various reports, including 'Community Checkup'. The main content area highlights the '2015 Community Checkup' with a list of links. A green arrow points to this section.

COMMUNITY CHECKUP

The *Community Checkup* is our annual report highlighting health care quality and value at medical groups and hospitals in Washington state. Providers use the data to discover areas for improvement, and consumers to help choose a primary care home. The community as a whole sees the report as a critical component in the overall effort to transform the health care system. The report demonstrates that everyone has room to improve.

Visit the [Community Checkup website](#) to see the latest data and analysis.

Produced annually, the *Community Checkup* has become the go-to resource for unbiased, trustworthy data about the quality of health care in Washington state. Read the reports and executive summaries for past year's data and findings.

Measure Descriptions [Hide ▲](#)

Childhood Immunization Status by Age 2

This measures the percentage of children who were two years old as of December 31 of the measurement year and had received all recommended vaccines that was reported to the Washington Immunization Information System (WIIIS). Recommended vaccines by age two include: four DTap/DT/Td, three Hib, three polio, three Hep B, one MMR, one Varicella, two Hep A, two flu, two PCV and two rotavirus.

[↗](#)

Adolescent Immunization Status by Age 13

This measures the percentage of adolescents who were 13 years old as of December 31 during the measurement year and had received one or more doses of the Tdap vaccine and one or more doses of the meningococcal vaccine that was reported to the Washington Immunization Information System (WIIIS).

[↗](#)

Human Papillomavirus (HPV) Vaccine for Adolescent Girls

This measures the percentage of adolescent girls 13 years of age as of December 31 of the measurement year who had three doses of the HPV vaccine that was reported to the Washington Immunization Information System (WIIIS).

2. WASHINGTON TRACKING NETWORK

Washington Tracking Network (WTN)

The Washington Tracking Network (WTN) is a public website where users can find data and information about environmental health hazards, population characteristics, and health outcomes. Users can view information on issues such as health disparities and socio-economic determinants of health, as well as detailed data on individual topics such as cancer, drinking water contaminants, or birth outcomes.

WTN lets you explore information and data on health conditions, environmental exposures, and community characteristics where you live, work, and play.

Population Characteristics - Washington Tracking Network (WTN)

What are population characteristics?

Population characteristics include: population age distribution, race, gender, education, household income, poverty, life expectancy, and other aspects that are associated with the health of a community.

Why should I care about population characteristics?

These and other factors influence and help to explain differences in the health of communities. For example, depending on where in Washington State a person lived in 2013:

- Life expectancy at birth ranged from 79 to 96 years
- High school graduation rates varied from a low of 46.2% to a high of 99.3%
- Median household income ranged from \$24,500 to \$54,000
- The percent of the population living in poverty ranged from less than 1% to a high of 80%
- Unemployment ranged from less than 1% to 35%

Maps and Data

[Search WTN](#) to find data and create maps for population characteristics and other related data such as health outcomes, exposure, and environmental topics in your community.

You can also explore WTN's [Information by Location \(IBL\) mapping tool](#) to see population characteristics and how they relate to health disparities and social vulnerabilities to hazards in Washington communities.

Learn More

To learn more about how Washington plans to reduce health disparities, visit our [Health Equity webpage](#).

Search Data

Understanding population characteristics can help to explain disease trends, environmental exposures, health disparities and intervention strategies.

WHAT IS COMMUNITY COMMONS?

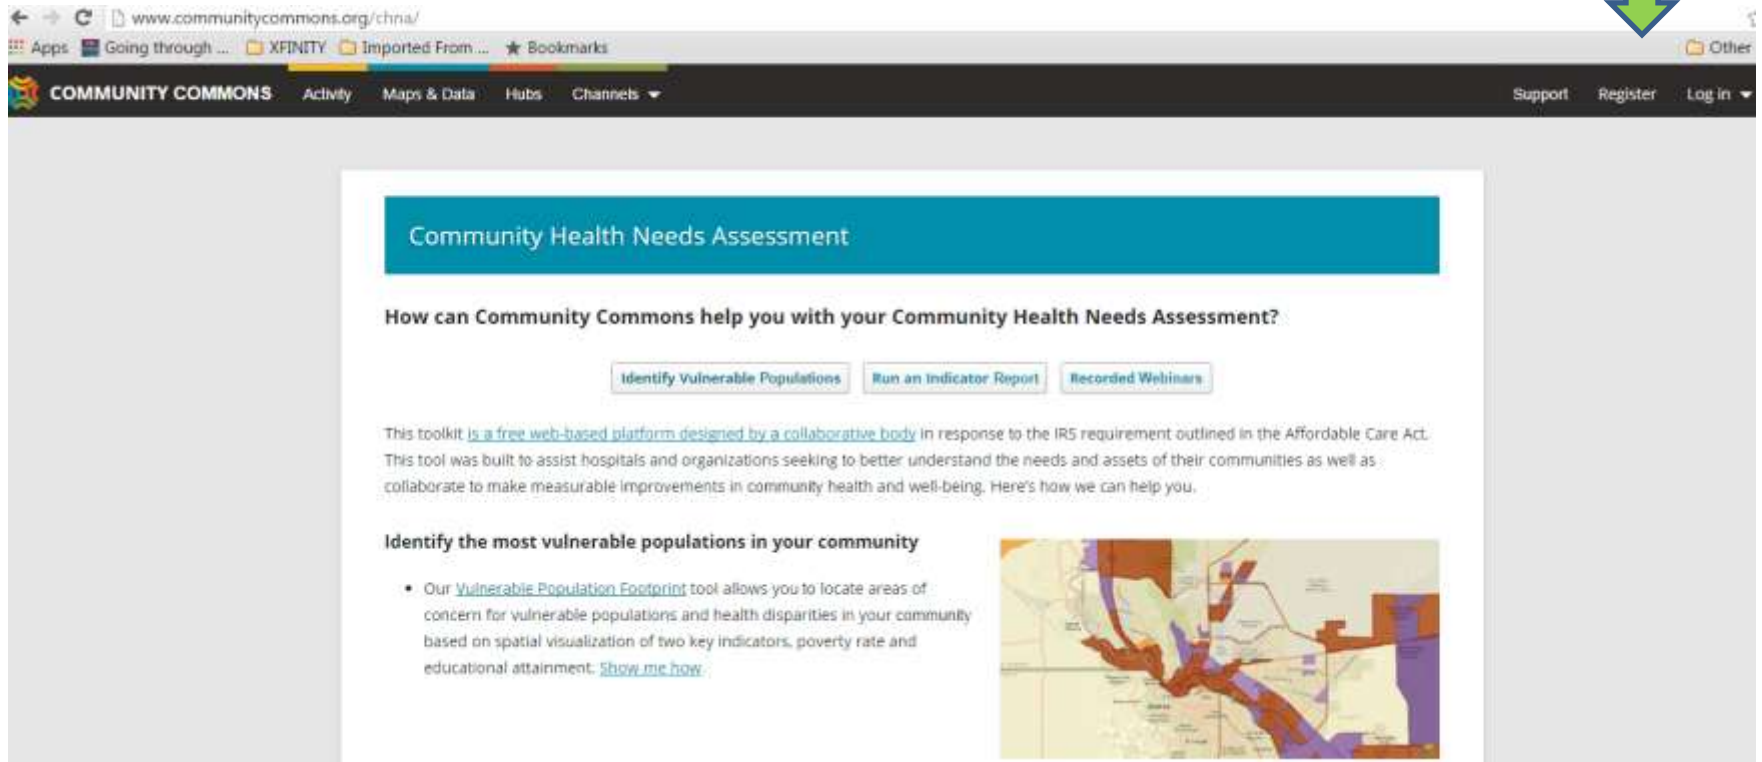

EXPLORE YOUR COMMUNITY

WHAT IS A HUB?

A New Tool to Find Areas of Opportunity

Last week Community Commons revealed a new tool as part of a six-week hack-a-thon organized by the White House's Opportunity Project. The goal was to develop on-line tools demonstrating "the art of the possible" using open data from federal and local sources. [Read](#)

1 Register for Free or log-in

The screenshot shows the Community Commons website interface. At the top, there is a navigation bar with the following links: COMMUNITY COMMONS, Activity, Maps & Data, Hubs, Channels, Support, Register, and Log in. A green arrow points to the 'Register' button. Below the navigation bar, the main content area features a teal header titled 'Community Health Needs Assessment'. Underneath this header, the text reads: 'How can Community Commons help you with your Community Health Needs Assessment?'. Below this text are three buttons: 'Identify Vulnerable Populations', 'Run an Indicator Report', and 'Recorded Webinars'. The text continues: 'This toolkit is a free web-based platform designed by a collaborative body in response to the IR5 requirement outlined in the Affordable Care Act. This tool was built to assist hospitals and organizations seeking to better understand the needs and assets of their communities as well as collaborate to make measurable improvements in community health and well-being. Here's how we can help you.' Below this text, there is a section titled 'Identify the most vulnerable populations in your community' with a bullet point: 'Our [Vulnerable Population Footprinting](#) tool allows you to locate areas of concern for vulnerable populations and health disparities in your community based on spatial visualization of two key indicators, poverty rate and educational attainment. [Show me how.](#)' To the right of this text is a map showing a spatial visualization of data, likely poverty rate and educational attainment, across a geographic area.

2

If registering for first time, select vulnerable populations

The screenshot shows the Community Commons website. The browser address bar displays www.communitycommons.org/2015/01/heres-what-you-can-do-on-community-commons/. The navigation bar includes the Community Commons logo, 'Activity', 'Maps & Data', 'Hubs', and 'Channels'. The main content area features a large 'Welcome!' message and a section titled 'Here's What You Can Do on Community Commons'. Below this, there are six buttons: 'GET INSPIRED', 'YOUR PROFILE', 'SUPPORT', 'EXPLORE HUBS', 'MAKE A MAP', and 'REPORTS'. A green arrow points from the text 'If already logged-in, please select vulnerable populations from your home page' to the 'VULNERABLE POPULATIONS' button. The right sidebar contains a 'Welcome!' message, a 'STAY INFORMED' section with a newsletter icon, and 'THE LATEST NEWS' section.

3 Using County Health Rankings to Find More Data

The screenshot shows a web browser window with the URL www.countyhealthrankings.org/using-the-rankings-data/finding-more-data/washington#chir. The page title is "Washington" and the sub-header is "Data Sources". Below the sub-header, a paragraph states: "These data sources provide information for communities looking for more local data. These sources provide either unique, local data; more information on **demographic** breakdowns (e.g., age, sex, race/ethnicity); or data for **sub-county** geographic units (e.g., cities, zipcodes or school districts)." Below this text is a table with five rows, each representing a data source. The table has three columns: Name, Description, and Breakdown.

Name	Description	Breakdown
Washington State Cancer Registry	Cancer incidence and mortality data by site and region are available for 1993 (hard copy only), and 1994 through 2010. Age- and sex-specific rates and stage at diagnosis are also available.	Demographic
Washington Tracking Network	The Washington Tracking Network contains data on: environmental exposure, health outcomes, and population characteristics at the state and county levels.	Demographic
Washington Vital Statistics Reports	The Department of Health collects high-quality information on all births, deaths, abortions, marriages, and divorces that occur in Washington State.	Sub-County Demographic
Washington Behavioral Risk Factor Surveillance System	The Behavioral Risk Factor Survey is an annual survey of Washington's adult population about behaviors which affect risk of disease and disability.	Sub-County Demographic
Washington State Department of Health Local Public Health Indicators	The local public health indicators website is an online data resource to help measure the health of Washington communities and inform the programs and policies of state and local public health agencies. The 35 indicators currently included in the local public health indicator's database provide a snapshot of health status, health behavior, and public health system performance at the local level.
